

ACTiSYS ACT-IR100MU Printer Compatibility List

Revision Date: 2011.1.20

©Copyright ACTiSYS Corp. 2006-2011

Incompatible Printer List- Reference Links, Applicable to ACT-IR100MU

Some Incompatible Printer Models:	http://www.mais.umich.edu/access/nonworkingprinters.html
Detail Incompatible HP Printer List:	http://h20000.www2.hp.com/bizsupport/TechSupport/Document.jsp?objectID=bpi05167
What is Host-Based Printing:	http://h20000.www2.hp.com/bizsupport/TechSupport/Document.jsp?objectID=c00252237

Note:

- 1) IR100MU will not be compatible if printer spec says: "Host Based Printing...".
- 2) IR100MU is likely compatible if printer spec says: "supports PCL" or "has fonts inside".
- 3) To print text from PDA or notebook, printer has to "support generic driver".
- 4) If Printer has built-in memory, supports multiple interface like USB, Parallel, then more likely to be compatible.
- 5) "Compatible Confirm" means tested to be compatible. Same series are "compatible" because of printer spec, but have not been tested.
- 6) Printers that have been proved to work well with any wireless printer adapters (e.g. Bluetooth, WiFi, etc.) have good chance to work with ACT-IR100MU.
- 7) Incompatible models may still work with IR100MU. If a printer is connected to PC, print a PC file, disconnected from PC, and connected to IR100MU, without turning off printer. Once printer is turned off and on, the above procedure needs to be repeated.
- 8) Different printer models may have the same model #. So please make sure the printer you are looking for is under correct category, e.g. Business Inkjet 2300dtn and LaserJet 2300dtn.

Release Note (If you update this document):

1. Please change the "Revision Date"
2. Please change the file name as per "Date"
3. Update "Revision History" of information first added.

Revision History	Description
2007.02.14, Jugal and Neelakrishnan	First Draft
2007.02.23, Yeh	Format Improvement
2007.02.26, Jugal	First Release
2007.03.03 Neelakrishnan	Added HP, Epson, Canon, OKI, Samsung, Dell, Lexmark printer
2007.04.13 Suresh	Added HP Printers(Deskjet3820/5650), Epson(Stylus CX5100/C87)
2007.04.20 Suresh	Added CANON Printer & Put HP 2015 printer model as compatible based on customer feedback
2007.11.22 Suresh	Added detail on Compatibility criteria (6)
2007.12.19 Suresh	Updated Compatibility Status of HP6940 based on customer feedback as compatible
2008.01.15 Suresh	Added Brother Laser HL-2070N printer (compatible from customer feedback)
2008.01.17 Suresh	Updated Compatibility: HP LaserJet 1320 based on customer feedback
2008.01.21 Suresh	Updated Compatibility: HP DeskJet 460 series based on customer feedback
2009.11.12 K.Yeh	Updated: HP Photosmart 2610, Laserjet 4015, per customers; MFP; Reformatted HP List
2010.03.18 Madhab	Updated: HP H470,H470b ,H470WBT ,P2035nCanon Image Runner 1025Samsung 2851ND,1630 ,Added Xerox
2010.11.02 Ben	Added HP Photosmart C7280
2010.12.23 Ben	Added HP LaserJet P4014; corrected P4015. No parallel interface
2011.1.20 Ben	HP LJ4050, Canon MF5750, Pixma iP100, Xerox Phaser 8560 updated.

Note: Why Host based Printer is not compatible to Printer adapter (Bluetooth, IR or Wi-Fi printer adapter)?

Printer adapter (e.g., ACT-IR100MU) just provides wireless pass through between your sender device (i.e. PDA, PC) and Printer. Therefore you have to install the same printer driver of your model at sender side. So your printer can understand printing format of sent data, like line feed, page format, color, printer attribute, etc..

However, Host based printer are designed to use more Sender PC resource than its own (i.e., to cost down, they has less RAM memory and is not so fast as processor/co-processor). So Host based printer always depends on sender PC through its printer driver at every command level. Printer adapter acts as Host which has no capability like PC to provide response on each command level. At the best, Adapter can handle some Generic printer command, not all specific, to printer manufacturer and there are various different host based printers from different manufacturer which makes it difficult to implement all at printer adapter side due to limited resource).

Due to this driver dependency at command level, Bluetooth printer adapter is not compatible to those Host based printers.

Note: IR100MU Printer Compatibility criteria:

1) Printer Driver requirement:

ACT-IR100MU itself does not require any driver. But don't mix-up with printer driver. Each IrDA enabled device (i.e. PC with USB dongle, PDA, etc) has to support the printer driver first. For example, if you want to print from a PDA/PC to a printer (i.e. Lexmark X646e), then your PDA has to support the driver of Lexmark X646e.

ACT-IR100MU is compatible to PCL/PS/Epson ESC/P language emulation supported printer.

IR100MU does not support Host based printer (i.e. printer with language support CAPT, GDI, PPA, LIDIL, SPL-C). Refer Note for additional information.

This is technically applicable to any IR, Bluetooth or Wi-Fi printer adapter available in market.

(2) Protocol Support:

ACT-IR100MU supports IrLPT protocol for IR communication. So first make sure that your opposite host device (i.e. PC, PDA) printing application also supports IrLPT protocol.

Note: Why Some of ALL-in one MFP (Multi function printer) not compatible with IR100MU?

Printer adapter compatibility depends upon (i) Used printer architecture and its support (ii) Opposite IrDA device support IrLPT and Which & how you install printer driver at opposite IrDA device. Generic printer driver at PDA/Handheld side work for Plain simple receipt kind of data to print but it is not necessary it should always work. So, Installing driver is key point.

For case of MFP, driver plus Printer architecture decide on certian specific command which one to choose from Printing, scanning, fax, copy etc...Most cases advance language like PCL/PS/Epson ESC/P supported printer have good architecture support but differnet printer vendor include different command style for choosing this multiple option which is covered at driver side. Hence, in some of cases, ACT-IR100MU may not be compatible with ALL-in-one MFP printer.

ACTiSYS ACT-IR100MU Printer Compatibility List

©Copyright ACTiSYS Corp. 2006-2011

Compatibility Status		Definition and Suggestion (For More Detail, Please Refer to Summary Page)				
Compatible Confirm		Printer is tested with IR100MU and it is compatible.				
Supposed to be compatible		As per printer spec IR100MU will compatible but not yet tested. We will give chance to customer to test				
Don't Know		Printer Spec is not much clear so we will not suggest to customer to buy, they can buy at their own risk.				
Not Compatible		Not Compatible" mean it will not support so please do not sale IR100MU to this customer				
Brand	Category 1	Category 2	Model	Compatibility Status	Interface	Reason
CANON	Multi function	Laser Printer	Image Runner 1025	Supposed to be compatible	USB2.0 HiSpeed	PCL 5e/6
